

Installation guide for small floor trap

The normal size for floor trap in Singapore is 150x150mm. For those floor trap smaller than normal, SS004 chokeless sink strainer is an option. Following are the steps.

Step 1: Use an A4 size paper to cut a square hole template that match your existing floor trap.

Step 2: Trace the square hole on the strainer.

Step 3: Use a cutter to cut the edges
